SERPENTINE BELTS

J - Dura-Prime Rib Pro Serpentine
K - Dura-Prime Rib Pro Serpentine
EPJ - Dura-Elastic Rib Pro Serpentine

TIMING BELTS

HTD - Dura-Sync Torque
STD - Dura-Sure Torque
GT - Dura-Torque GT
RPP - Dura-Precision

FEATURES

Quality belts resulting in reduced downtime
& maintenance costs

Resistant to oil, heat, and moisture

Superior flexing, enhanced grip for
moist conditions

Resistant to hardening and glazings

High strength polyester or aramid cord

Durable advanced rubber compound

USES

Baggers
Labelers
Wrappers
Conveyors
Printers

RELIABILITY IN EVERY REVOLUTION

Our Vertical Integration Process Ensures Superior Quality & Value

By manufacturing our own cord and fabric, owning rubber tree plantations and belt molds, and mixing chemicals to create our own compounds we guarantee top quality belts and eliminate inflated pricing.

Why D&D?

BECAUSE TESTING PROVES OUR BELTS ARE THE BEST!

In independent testing conducted by the Akron Rubber Development Laboratory, Inc.*, D&D belts outperformed Gates and Browning belts in break force strength by an average of 17% - 34.7%, and within an average of 1.16% - 3% in elongation.

This clearly shows our belts not only match but often exceed the quality of those from an industry leader, and are offered at a more competitive price thanks to our vertical integration manufacturing process.

It's a win-win for both our partners and their customers.

* Independent testing results available upon request.

** Additional fees assessed for emergencies.
